

Credit Feature

Origin

“Let Lolis work less and play more.”

Many players have shared that they don't want to see the cute Lolis working so hard just to buy things. In response to this feedback, the developer reached a convenience agreement with the "Better Buy" merchant.

Introduction

Credit Feature was added to reduce the financial pressure on Players during the early stages of the game:

- * **Basic Rules** □ All items in the store priced **under \$1000** support purchasing on credit.
 - * **Main Purpose** □ Allows Players to prepare daily necessities and exquisite items for their VPet first, without needing to frequently rush to work due to a temporary lack of funds.
 - * **User Experience** □ Players can choose and buy flexibly according to their needs—“enjoy now, pay later”—allowing Lolis to enjoy a more relaxed and pleasant daily life under the Player's careful care.
