

Inventory Features

Access Guide

Players can open the inventory directly by clicking the **Backpack** icon in the **Feeding Panel**. 

Feature Introduction

The inventory provides a better environment for the gaming experience:

- **In-depth MOD Expansion** Supports MOD creators in adding more custom items, expanding storage logic, and related derivative features.
- **Growth Benefits** The system issues a “Daily Gift Box” every day. Upon opening, you can obtain various random items. The richness of the rewards increases with the current level of the VPet.

Usage and Consumption Rules

When using items, please pay attention to the special markers on the interface:

- **** Never Consumed** Items in the inventory marked with a **checkmark symbol** will not be consumed after use. Players can keep and reuse them permanently.

Regular Consumption: Consumable items without a checkmark will disappear normally after use.
