

Features

□ Photo Gallery

You can now open the **Photo Gallery** from the **System** section. It contains most of the visual assets from *Virtual Pet Simulator* that are currently available to the public, including amusing memes, lively GIFs, and beautifully illustrated CG artwork. Most pictures are available as quest rewards and can be unlocked gradually by completing specific objectives during normal gameplay. If you would rather skip the grind, you can also purchase them directly with in-game currency. A pop-up notification appears whenever a new picture is unlocked. In the gallery, you can open each picture to view details such as its name, unlock time, and unique description. You can also export pictures to your computer or copy them to the clipboard for easy sharing.
